EDUCATION

Texas A&M University
Mays Business School
College Station, Texas
Master of Land Economics and Real Estate

Texas A&M University
Mays Business School
College Station, Texas
B.B.A. with Honors - Finance

CERTIFICATION

State-Certified General Real Estate Appraiser, State of Texas, No. TX-1380184-G

PROFESSIONAL HISTORY

Real Property Analytics, Inc., College Station, Texas
Research Manager and Senior Consultant
August 2005 to Present

Integra Realty Resources, Fort Worth, Texas
Internship
May 2005 to July 2005

REPRESENTATIVE EXPERIENCE

Environmental Contamination – Commercial and Industrial Properties

Analyzed the effects of environmental contamination on the market value of an industrial site in Baltimore County, Maryland.

Prepared an estimate of foregone income as a result of prevailing environmental conditions at four industrial/light-manufacturing properties in Texas and Louisiana.

Analyzed the effects of groundwater contamination on commercial properties in St. Petersburg, Florida, using paired sales analysis.

Analyzed the effects of environmental contamination from a former landfill site on the market value of two undeveloped tracts of land in Macomb County, Michigan.

Analyzed the effects of environmental contamination on the market value of an industrial site in Jacksonville, Florida.

Environmental Contamination – Residential and Rural Properties

Analyzed property value impacts on twenty improved residential and unimproved properties due to environmental issues stemming from a former mine site in Clover, South Carolina.

Prepared a series of multivariate statistical models to analyze the effects of remedial activities on residential properties in Port Hope, Ontario.

Analyzed real estate issues with respect to class certification of residential properties in Santa Rosa County, Florida, allegedly impacted by odors from a chemical manufacturing facility.

Prepared multiple regression analyses and paired sales analyses to evaluate the effects of historic copper mining and smelting operations on residential properties in Opportunity and Crackerville, Montana.

Analyzed the effects of groundwater contamination on residential properties in Monrovia, Maryland.

Analyzed real estate issues with respect to class certification of both commercial and residential properties allegedly affected by contamination from a former smelter in Blackwell, Oklahoma.

Estimated property value diminution due to groundwater contamination on a ranch property in Nueces, Kleberg and Jim Wells Counties, Texas.

Analyzed the effects of environmental contamination and remedial activities on the market value of residential properties in Carson, California.

Estimated property value diminution due to groundwater contamination on a ranch property in Hidalgo County, Texas.

Analyzed the effects of groundwater contamination on properties in a residential subdivision in Carroll County, Maryland.

Prepared a series of multivariate statistical models to evaluate the alleged impacts of PCBs to waterfront properties along Escambia Bay in Florida.

Analyzed real estate issues with respect to class certification of both commercial and residential properties allegedly impacted by groundwater contamination in Myrtle Beach, South Carolina.

Analyzed real estate issues with respect to class certification of both commercial and residential properties allegedly impacted by groundwater contamination in St. Petersburg, Florida.

Analyzed real estate issues with respect to class certification of both commercial and residential properties in proximity to a refinery in Texas City, Texas.

Estimated property value diminution due to a petroleum pipeline rupture on a ranch property in Brazos County, Texas.

Evaluation of Impacts from High Voltage Transmission Lines

Conducted a study using multiple regression analysis to estimate the impacts of high voltage transmission lines (HVTLs) on rural and residential properties throughout the state of Wisconsin.

Conducted a study using multiple regression and paired sales analysis to estimate the impacts of HVTLs on commercial and industrial properties in Madison, Milwaukee, and other urban areas in Wisconsin.

Analyzed the effects of HVTLs on the market value of rural properties in Texas using paired sales analyses.

Analyzed the impacts of HVTLs on the development potential of ranch land in Fresno County, California.
